

6516206261.txt

Do what is right by your constituents and let our own pocketbooks decide what we can or cannot listen to. Don't legislate my choices in audio entertainment and information. I vote regularly and contribute to the republican party...I will continue doing one and stop doing the other if these are the type of haribraind issues that you all are going to continue to peruse through. I seriously hope that reconsider this action and leave the valuable service that XM and other satellite radio providers provide available in its current form to the millions of hard working voters that enjoy its varied and valauable listening content.
